

HENRY ANI

FULL-STACK WEB DEVELOPER • SAAS BUILDER • SEO SPECIALIST

Enugu State, Nigeria • 08072378767 • henrifydev@gmail.com • henrify.dev • github.com/Henry-3551 • linkedin.com/in/henry-ani-200342412

PROFESSIONAL SUMMARY

Full-stack web developer and SaaS builder focused on creating responsive, user-centered, performance-conscious digital products. Experienced with React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Node.js, and modern web development workflows. Builds across the product lifecycle—from interface design and frontend architecture to authentication, database design, access control, APIs, SEO, deployment, and product iteration. Strong interest in practical digital products, frontend engineering, product thinking, and turning ideas into usable web experiences.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, Responsive Design, Mobile-First Development

Backend & Data: Supabase, PostgreSQL, Node.js, REST APIs, Authentication, Row Level Security (RLS), Database Design, SQLite, IndexedDB

Engineering: Git, GitHub, GitHub Actions, API Integration, Role-Based Access Control, Environment Configuration, Deployment Workflows

SEO & Performance: Technical SEO, On-Page SEO, Metadata, Structured Data / JSON-LD, Semantic HTML, Performance Optimization, Accessibility

Product & Design: Figma, UI/UX Design, Product Architecture, SaaS Development, Progressive Web Apps (PWA), Mobile-First Product Design

Other: Python, Browser APIs, Speech APIs, Automation Concepts

PROFESSIONAL EXPERIENCE

INDEPENDENT FULL-STACK WEB DEVELOPER & PRODUCT BUILDER

Nigeria | Freelance / Independent

- Design and develop responsive websites and web applications for businesses, organizations, and independent product ideas.
- Translate business requirements and Figma concepts into functional React-based interfaces and production-oriented applications.
- Develop backend foundations using Supabase, PostgreSQL, authentication, database policies, and API integrations.
- Implement SEO-conscious structures including metadata, semantic markup, structured data, performance improvements, and crawl-friendly page architecture.
- Work across requirements, UI implementation, backend architecture, Git/GitHub workflows, testing, debugging, and deployment.
- Build with emphasis on mobile usability, maintainability, and practical business requirements.

SELECTED CLIENT & COMMERCIAL WORK

C-Infini Properties Ltd — Real Estate Platform

Full-Stack Web Developer

- Developing a modern commercial real-estate website for C-Infini Properties Ltd.
- Built the frontend foundation with React, TypeScript, Vite, and Tailwind CSS.
- Implemented a Supabase/PostgreSQL backend architecture for property management and administrative workflows.
- Established authentication and administrator access controls using Supabase Auth and database-level security policies.
- Designed the property management foundation to support property listings, publishing workflows, and future media management.

Xavier Place — Restaurant Website

Web Developer

- Developing a restaurant web presence based on the business's brand, menu, promotional materials, and customer experience requirements.
- Translating real business content and supplied media into a responsive digital experience.
- Focused on mobile-first presentation, menu accessibility, clear calls-to-action, and conversion-oriented UX.

SELECTED PRODUCT PROJECTS

Waspi.me — WhatsApp-First Commerce Platform

Founder / Full-Stack Product Developer

- Building a SaaS platform helping small businesses create affordable online storefronts and convert social-media traffic into WhatsApp conversations and orders.
- Developing merchant storefronts, product management, onboarding, cart flows, and WhatsApp order handoff.
- Building free WhatsApp utilities including link generation and branded short-link functionality.
- Applying staged product architecture for future Pro functionality while keeping the initial product simple and usable.

Technologies: React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Git/GitHub

JARVIS — Personal AI Assistant

Founder / Software Developer

- Building a lightweight command-line-first personal AI assistant for constrained hardware.

- Implemented Python architecture with SQLite memory, configurable LLM API integration, filesystem/terminal tooling, and explicit permission boundaries.
- Structured automated testing and stabilization workflows for reliability and maintainability.

Technologies: Python, SQLite, LLM APIs, CLI, Git

NTA Quiz System — Interactive Quiz Platform

Full-Stack Web Developer

- Developed an interactive quiz system for moderated live quiz sessions.
- Structured moderator-controlled question selection, answer revelation, timing, and score-management workflows.
- Focused on predictable interaction flows and live-event usability.

Technologies: React, Vite, JavaScript, Web Application Architecture

9JA Ludo — Multiplayer Social Gaming Platform

Product Developer

- Developing a Nigerian-focused social gaming platform concept centered around multiplayer Ludo and social interaction.
- Designed mobile-first interfaces and product flows with PWA direction and localization considerations.

Technologies: React, TypeScript, JavaScript, Tailwind CSS, PWA, Figma

042Votes — Election Collation & Field Operations Platform

Full-Stack Web Developer

- Developed a platform concept for structured election field operations and result-management workflows.
- Implemented workflows for agent registration, verification, polling-unit structures, administrative management, and result submission.

Technologies: React, Vite, Tailwind CSS, Supabase, PostgreSQL

ADDITIONAL PROJECTS

Henrify Translator — PWA with browser translation, speech input, offline functionality, and IndexedDB storage. **PulseForge Fitness** — responsive gym website with conversion-oriented UI. **P&P Home Services** — professional service-business landing page with SEO-conscious structure. **Henrify.dev** — developer portfolio focused on frontend development, SEO, SaaS projects, and client work.

EDUCATION

Nnamdi Azikiwe University, Awka

Bachelor's Degree in Electrical Engineering — In Progress

PROFESSIONAL STRENGTHS

Product-oriented software development • Frontend architecture • Responsive UI engineering • Full-stack application development • Problem solving • SEO-conscious web development • Independent project ownership • Rapid learning • Business-to-product translation • Mobile-first and user-centered development
